Tragic Railway Accident Shocks Whole District

Orville Chase Hit by Fast Train at Irma Crossing and Instantly Killed While Driving a Truck over Track Friday Eve.

The whole of this district was shocked to learn of the fatal railway accident, which occurred at about 6.30 p.m. on Friday, July 26th, 1929, when Orville Lee Chase who was driving a truck, was hit by the Confederation Limited, while he was attempting to cross the railway on the crossing east of the station.

He had delivered a load of grain to the Security elevator, and was starting to return home. It appears that his view of the main line was somewhat obstructed by a freight train that was standing on the side track close to the crossing.

As he had gone over the crossing a short while previously, while the freight train was still in the same position, he no doubt did not think of the Confederation Limited being due at the time, or there possibly something to take his attention at that time, as he was a man of very careful and cautious habits, and would never have taken any similar chance under ordinary circumstances.

The truck was struck in about the centre and was completely demolished. He was carried on the pilot of the engine for a distance of about 1800 feet, before the engineer of the train was able to bring his train to a standstill, which he did with the utmost haste, as he was travelling at about 45 miles per hour at the time.

Death came almost instantly, as Mr. Chase was about opposite the cylinder of the engine, and was on the side of the truck nearest to the engine. Sergeant Stewart of the A. P. P. was immediately notified, and hurried to the scene of the accident, together with Dr. Johnson of Wainwright.

The body was removed to the basement of the United Church.

The inquest was held on Monday, July 29th and the Coroner's jury, after hearing the evidence, returned a verdict of accidental death, exonerating the train crew and recommending that where the view of the main tracks from private crossings is obstructed by a train standing on a side track, that the private crossing be protected.

Mr. Chase was a citizen and friend who was held in the greatest respect and admiration by the whole community, and was well known throughout the neighboring communities. He leaves to mourn his loss, his wife, and two months old baby, a brother and a nephew.

He was also a Past Master of Irma Masonic Lodge, and a member of the Order of the Eastern Star, where he commanded the love and respect of all, and his passing leaves the lodge with a feeling of emptiness.

FUNERAL OF ORVILLE CHASE LARGEST HELD IN IRMA

The funeral of the late Orville Lee Chase, victim of the tragic railway accident of last Friday, was held on Tuesday, July 30th, 1929, at 3 p.m. from the Irma United Church, at which were gathered the largest number of persons who have ever attended a funeral in this town, bearing

Granville Jones
Will Lecture on the Third Evening of Chautauqua on "The Philosophy of a Hill-Billy."

striking testimony to the love, respect and admiration in which the deceased was held in every part of a large territory.

The funeral was held under the direction of Gratton Lodge A. F. and A. M. of which the deceased was a Past Master, and in which he was revered.

The service of the United Church was conducted by the Pastor, Rev. J. R. Geeson, who gave the mourners courage and hope and cheer, from the resurrection of Our Lord, the 23rd Psalm and a favorite reading of the Scriptures, of the deceased, formed part of the simple but impressive service, as did also one of the deceased's favorite hymns, "What a friend we have in Jesus."

At the conclusion of this service, the Masonic Lodge held their service, in which they were supported by the District Deputy Grand Master of Grand Lodge of Alberta and numerous brethren from Viking, Jarow, Wainwright and Hardisty Lodges, bearing mute witness of the respect and love they bore for the deceased.

It was early recognized that the Church, would hold only a fraction of the people, and the service was therefore held outside the Church, where the Pastor officiated from the steps of the Church.

At the conclusion of the services at the Church, the Masonic brethren, followed to the funeral procession and the casket was then borne by the pallbearers, Mr. Bros. F. C. Wiese, W. Masson, Pryce Jones, H. Symonds, S. Bridgeman, and J. S. Sutherland, to the hearse, and the procession then moved behind the slow marching brethren to the cemetery. It is estimated that the procession was fully three quarters of a mile long. The solemn rites of the Dead were performed at the graveside, by the Church, Masons and Eastern Stars and thus brought to a close, one of the most tragic episodes in the history of Irma.

Messages of condolence were received from friends and relatives in the United States and Canada. Floral tributes were received from the following: Mildred and Murray, Mr. and Mrs. J. L. Allen and family, Mr. and Mrs. Grant and family, Della, Alta, Mr. and Mrs. McLean and family, Sylvan Lake, Alta, Mr. and Mrs. Banks and Irene Banks, Strone, Alta, the Shedd family, Edmonton, Mr. and Mrs. Kobitzsch, Mr. and Mrs. P. W. Kobitzsch and Mr. and Mrs. Elmer Dods, all of N. Royston, Gratton Lodge A. F. & A. M., Buffalo Park Lodge A. F. & A. M., Victory Lodge A. F. & A. M., Sunrise Chapter O.E.S., Mr. and Mrs. I. T. Skiles, Mr. and Mrs. W. Masson, Mr. and Mrs. Richard, Mr. and Mrs. S. S. Sanderson, Mr. and Mrs. F. C. Wiese, Mr. and Mrs. G. A. Tripp, Mr. and Mrs. T. W. Shaw, Mr. and Mrs. J. Fletcher, Mr. and Mrs. W. J. Bishop, Mr. and Mrs. P. J. Hardy, Mr. and Mrs. L. A. Schon, Mr. and Mrs. Long, Mr. and Mrs. Blakely, Mr. and Mrs. Burrell, Mr. and Mrs. C. T. Hill, Mr. and Mrs. F. M. Hill, Mr. and Mrs. Ross McFarland, Mr. and Miss Donaghe, Mr. and Mrs. W. N. Frickleton, Mr. and Mrs. Frank Peterson, Mr. and Mrs. A. E. Peterson, Mrs. B. Hewitt, Mr. and Mrs. R. J. Tate, Mr. and Mrs. Fluvevelling, Mr. and Mrs. J. W. Stuart, Irma Ladies Aid, Irma Women's Mission Society, Irma Women's Institute, A Friend, The Neighbors, The Community.

The mourners, Mrs. Mildred Chase, widow, Murray McKillop, nephew, Mr. Willard Chase, a brother, and Mr. John Patrick, an uncle from North Branch, Mich., U.S.A., Mr. and Mrs. Grant of Delta, and Mr. and Mrs. McLean, Sylvan Lake, cousins, Mr. and Mrs. J. L. Allen & family, immediate relatives of the widow, Mr. and Mrs. C. Allen, Fabyan, Minn., and Mrs. Peewee, and Mr. and Mrs. Maine of Millet, Mrs. E. Allen and daughter of Forestburg, Mr. and Mrs. Shedd of Edmonton, Mr. and Mrs. Banks and Irene, Mr. and Mrs. Chieson and Mr. Behnke of Strone.

DRILLING NORTH KINSELLA FOR OIL

(From Viking News)

The Duluth Syndicate, with headquarters at Duluth, Minnesota have brought in a drilling outfit and are drilling thirteen miles northeast of Kinsella. Mr. Svensen, an experienced driller, is in charge, and we are informed, from a reliable source that the company is going to make an earnest effort to tap the oil sands which this structure is generally believed to contain, all reports to the contrary. There is no doubt in any one's mind that in a few short years or months the Viking field will be known just as well and perhaps better as an oil field as Turner Valley and Wainwright.

BLACKIE TEAM WINS CAMROSE BALL TOURNAMENT

Defeated Ponoka in Final Contest Saturday by 3-1 Score.

Of the twelve teams competing in the Camrose baseball tournament in connection with the Camrose Exhibition on July 25, 26 and 27, seven were eliminated by Friday night. The teams out of the contest were Mirror, Viking, Camrose, Botha, Barhead, Junkins and Red Deer. This left Ponoka, Merna, Farmangay, Blackie and Coutts to settle accounts in the four games on Saturday.

The Saturday morning game between Ponoka and Merna proved an easy triumph for Ponoka which almost required an adding machine to take care of its score. The game at 1 p.m. between Blackie and Farmangay was also a tame game with the latter team hanging up full line of ciphers on the score board.

However, interest in the competitions was revived when Ponoka and Coutts took the field for the second last game. The two teams showed real action, Ponoka winning 9 to 3. This was a much better game than the score would indicate.

Then came the clash in the final between Blackie and Ponoka. Ponoka had already played two games the same day while Blackie had participated in only the first afternoon game which permitted them of a rest between the second and fourth games of the day. Ponoka had only a brief recess after its conflict with Coutts. It was a real game and provided about four thousand spectators with a demonstration of first class baseball, by taking a score of three and keeping Ponoka down to one count, Blackie carried off the honors of first place among the twelve teams in the three-day tournament.

JURY EXONERATES CREW OF TRAIN

Monday Dr. Johnson, Coroner, held an inquest on the remains of the late O. L. Chase, who was killed at Irma last Friday evening. The following composed the jury, Mr. R. D. Smallwood, J. Fletcher, Jas. Hedley, Wm. Masson, Ross McFarland and H. W. Love. The crew of the engine that struck the truck in which Mr. Chase was driving and the crew of the freight that was standing on the side track at the time of the accident were examined by Sergeant Stewart as well as Mr. J. Bishop to whose elevator the deceased had just delivered a load of wheat. After considering evidence produced the jury brought in the following verdict and rider: "We, the jury find that Orville L. Chase, came to accidental death on July 26th through collision with train No. 4 on the private crossing at the East end of railway yard, in the Village of Irma and we exonerate the train crew from all blame." The following rider was recommended by the jury: "We the jury recommend that the railway company, in case of private crossings, where trains are waiting and obstructing the view of oncoming trains, require one of the crew to flag the crossing."

UNITED CHURCH SERVICES

Services in the United Church as follows:

Strawberry Plains — 11 a.m.
Alma Mater — 3 p.m.
Irma — 8.00 P. M.

Subject "Jesus, God's Final Revelation."

NEWS ITEMS FROM KINSELLA

Lewis Overbo left Tuesday morning by auto for Camrose where he has accepted a position with the Maytag Company. He was accompanied by Knut Overbo.

A severe windstorm struck Kinsella and district on Saturday afternoon which did considerable damage blowing down windmills and removing roofs from various buildings. Thom Wood's house north of town was shifted several rods. This was one of the worst windstorms experienced in this district for some years and no doubt is due to the extreme heat and dry weather.

Mr. A. L. Eastly, publisher of the Sedgewick Sentinel has purchased an aluminum power washing machine from J. J. Overbo, authorized Maytag dealer.

Miss Hilda Westgaarn and Miss Gudrun Skori left on the Saturday evening train for Vancouver, B. C. They will make a short stop over at Edmonton to visit friends there before proceeding to the coast city.

Mr. Figgure who recently underwent a serious operation in the University hospital at Edmonton has returned to his home at Kinsella. Mr. Figgure, though quite weak and confined to his bed most of the time is slowly gaining lost strength and we wish him a speedy recovery.

A gathering is planned for Sunday, August 4th at Lake Hatty. As high as sixty cars have been counted at this lake some Sundays. It is a fine place for bathing, the lake having a hard sandy bottom. Bring along refreshments and let's go.

Since the last good rain the crops have improved considerably, and some of the best fields may make up to fifteen bushels to the acre and in some cases may exceed this amount. Rain has been needed for some time and reports are to the effect that feed is going to be scarce.

Many from here visited Wainwright on Sunday to take a glimpse at the burned ruins and report a very horrible fire.

Mr. and Mrs. Fred Green was the guest of Mr. and Mrs. James McClements last week.

Ellen Alberta Green is staying with Mr. and Mrs. J. C. Cartmel for a week's vacation.

Miss Ethel Green was a week end visitor with Miss Elma Nordstrom.

SALE & REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that 1 Bay Mare, White Strip on face, halter on, branded box with verticle bar above, on right thigh, was impounded in the pound kept by O. Creteau, located on the N. E. 24-45-7 on Thursday the 27th day of June, A.D. 1929, and that the said animal was sold on the 29th day of July, 1929 to Frank Trateck of Wainwright, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

R. J. TATE, Sec.-Treas. of M. D. Battle River, Post Office Irma.

IN MEMORIAM

In loving memory of our dear little son, William who passed to the Great Beyond, July 23rd, 1928.

One sad and lonely year gone by Since one we loved was called away; It is just as new to us this day, As was the hour he passed away.

Gone from us but leaving memories Death can never take away. Loved, remembered, longed for always.

While upon this earth we stay, Daily, hourly, do we miss him, Sadly do we feel our loss; Lonely in our home without him Help us Lord to bear our cross.

Ever remembered by his sorrowing parents Mr. and Mrs. W. Masson.

There will be a dance as usual in Kiefer's new hall, Saturday evening, August 3rd. Same hours, same music same price as before.

WHEAT POOL NOTES FOR THIS WEEK

A second interim payment on wheat delivered during the past crop year was announced by the Alberta Wheat Pool on Wednesday, July 31st. The basis of this payment is:

1 Nor.	17 1-2c
2 Nor.	14c
3 Nor.	13 1-2c
4 Wheat	18 1-2c
5 Wheat	12c
6 Wheat	4c
Feed Wheat	3 1-2c
Tough 1 Nor.	23c
Tough 2 Nor.	20 1-2c
Tough 3 Nor.	18 1-2c
Tough No. 4	22 1-2c
Tough No. 5	16 1-2c
Tough No. 6	7 1-2c
Tough Feed	10 1-2c

Besides the above, payments were made on something like eighty other grades ranging as high as 46 1-2c on 3 Tough Smutty Wheat, to as low as 3c on broken wheat.

The total amount of the payment made by the Alberta Pool was over eight million dollars. There will be another payment during the coming fall.

Deductions for elevator and commercial reserves and for operating expenses, totalling 4c a bushel, have been made from the payment to members. This amount is slightly more than will be required but the exact figures will not be available for some time yet, at the end of the Pool's business year. When the final figures are available the excess will be refunded to members along with the final payment.

Taking every phase of the marketing year into consideration it must be admitted that this interim payment is on the whole a very good one. It may appear to some that the payment on No. 6 and Feed Wheat is proportionately small, but it must be remembered that when the initial payment was made the price was from \$1.00 to 85c last fall the payment on No. 6 and feed wheat was cut only by 5c a bushel.

The 1928-29 crop year was a difficult one for the Canadian Wheat Pool because of the unusually heavy production the world over. Canada raised a record crop — about 520 million bushels — and Argentine, Australia and the United States all had very large crops of wheat.

Coming as it does at a time when crops generally are none too promising this Pool payment will be thrice welcome. The size of the payment will undoubtedly be a surprise to some for it was predicted during the low range of wheat prices in the spring that the Wheat Pool might possibly be unable to make any further payments.

On the new crop the Wheat Pool has announced the initial payment will be on the basis of \$1.00 a bushel.

U. F. A. AND U. F. W. A. RALLY

A Rally of the Wainwright U.F.A. and U.F.W.A. Provincial Constituency Association will be held on Saturday, August 3rd at eleven o'clock on the picnic grounds in the Buffalo Park. Business Meeting in the morning. Addresses by Mr. Love and a cabinet minister in the afternoon. Basket Picnic, Tea and Coffee provided. Come and bring your friends.

What Is a Good Government?

Hon. P. D. Bennett, in addressing a meeting at Stratford, Ontario, recently asked a question, and in answering it, gave a definition of a good government. He said:

"It is not true that we had a government that would look after the interests of Canadians and Canadians only. You say that is a selfish policy. Ah, my friends, all good governments are selfish and the measure of the goodness of a government is the measure of its selfishness."

Mr. Bennett was, of course, discussing the relative merits of the tariff policies of the Liberal and Conservative parties, and especially so in the light of the impending tariff changes at Washington. These being issues of a partisan character it is not our intention to discuss them, or express any opinion in regard to them. But it is quite in order to analyze and discuss Mr. Bennett's dictum that "all good governments are selfish," and that the measure of the goodness of a government is the measure of its selfishness.

Governments under our democratic system of responsible government are, or should be, but a reflection of the people themselves. They are brought into being by the expressed will of the people and are supposed to give expression in legislation and administration to the wishes of the people. Therefore, if a good government is a selfish government, it follows that selfishness is the sign manual of a good people, and that the selfishness of any people is the measure of their goodness. Do the Canadian people believe this? Are they prepared to accept it as true?

Acceptance of this doctrine would be to deny all the teachings of Christianity. It would be to nullify and reject the Golden Rule. It would set up a standard of conduct for nations and peoples that could have but one result—continued warfare.

If the measure of the goodness of a government is the measure of its selfishness, then a "good" government in Manitoba, Saskatchewan, Alberta, or any of the other Provinces, would be one which pursued a policy designed to advance its own interests regardless of the interests and welfare of any other Province, or of the Dominion, or the Empire as a whole. Such a policy would mean endless friction, constant turmoil, the ultimate smash-up of Confederation.

Suppose, for example, that rightly or wrongly, the Western Provinces of Canada insisted that their particular interests demanded the complete removal of all customs tariffs, and they refused absolutely to give any consideration to the views, the interests, the welfare of the Eastern Provinces which believe in customs tariffs. What would be the results?

All government is a matter of compromises. No one group of people, no one community, no one province, can selfishly insist upon acceptance of its views and its policies to the detriment of all other groups, communities, and provinces. But if selfishness is to be the measure of a good government, then insistence by each group, or community, or province, upon its own views and policies means that any and all compromise will be impossible, and government itself must fail.

Acceptance of Mr. Bennett's doctrine would condemn the governments of Great Britain for many decades past as the worst governments in the world, because it has been the policy of British Governments to adopt policies of unselfishness, to assume heavy burdens and accept great responsibilities in behalf of backward peoples and smaller and weaker nations. Great Britain unselfishly entered the war against Germany in defence of the rights and integrity of Belgium. Following the war Britain waived all debts owing to her by other allied countries, save, and except an amount sufficient to cover her own indebtedness to the United States. These are but two comparatively recent examples of British policy, but it is being exemplified at almost every meeting of the League of Nations. That League, for example, could not exist five minutes if the nations of the world were animated by, and acted upon Mr. Bennett's definition of what constitutes a good government.

The most selfish form of government is an absolute autocracy. How would Mr. Bennett like Premier MacKenzie King to adopt the selfish attitude of Mussolini in Italy, take all powers of government into his own hands, and prohibit any opposition parties from functioning? That's selfishness in government. Is it good? Whatever Mr. Bennett may think, the people of Canada want none of it.

Suggests Powerful

Signals For Vessels

Sea Should Be Better Illuminated Says French Writer

A well-known French writer has pointed out that ships have been backward in making use of the great improvements made in modern electric lighting. He states that in this modern age of illumination the sea is the only part of the globe which is plunged into obscurity at nightfall, and recommends that ships should employ powerful signals like the headlights of motor cars. Undoubtedly the weakness of ships' lighting is a contributory cause to many collisions that occur at night, and the

fuller study of the possibilities of more powerful electric lighting is worthy of the labors of the Conference (the International Conference for the Safety of Life at Sea.)

Holstein Bull Goes East

Prize Winner From Strathmore Purchased By Quebec Interests

The Raymond Farm, at Vaudreuil, Quebec, recently purchased a Holstein bull from the Canadian Pacific supply farm in Strathmore. This young bull, Strathmore de Winton Matchless, was junior champion last year at Calgary, Edmonton and Saskatoon, although defeated at other shows by his half mate Strathmore McKinley Partridge Wayne.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians and laymen. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

New 'Plane Is Climber

British Machine Reaches Four Mile Height In Fourteen Minutes

An all-steel airplane that can climb to a height of four miles in less than 14 minutes is the latest addition to Britain's air fleet.

The plane is a single-seater equipped with a super-charger and specially-gearred Jaguar motor developing 400 horse power. With a full load of machine guns and ammunition in addition to electrically heated clothing and oxygen breathing apparatus, it can climb to a height of six miles. Its top speed is 155 miles an hour.

The plane is intended to take off from a home defense aeroplane and to climb rapidly to get above enemy raiding machines as soon as information is received that they have crossed the coast.

LIFE WAS A BURDEN

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. V. J. Dowling, Tottenham, Ont., and further, "I was so badly run down that I felt that life was a burden. The doctor said my trouble was due to poor blood, but his medicine did not help me. My face was sallow, my lips bloodless and at the least exertion my heart would palpitate so violently that I would have to lie down. My feet and legs would swell and cramp, and all my friends thought I was in a decline. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my delight, by the time I had used them I began to feel better. I got a further supply and kept on taking them. Daily I felt myself growing stronger. The color returned to my cheeks and lips and I felt a new interest in life. To sum up I can now say that I am feeling fine, for which I give the credit to Dr. Williams' Pink Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by the Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail post paid on receipt of price. See Try them today.

Developing Trade

Increased Travel To The West Indies Follows Inception Of New Service

Since the inception of the new service between Canada and the British West Indies, by the R.M.S. Lady Nelson, in December last, the Canadian National steamship's boats have been practically booked to capacity on every sailing. Traffic from Canada to the West Indies has developed tremendously since the inception of the new Canadian National line, and there has also been an increase of travel from the West Indies into Canada particularly in the summer time when attractive rates give the West Indies business man an opportunity of going to Canada to study the markets there.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Horses Live In Zoo

The stable of a London horsekeeper is a zoo, the animals sharing the house with the horses. There are 100 horses in the stable and with them, living contentedly, are two Indian monkeys, a wild hare, a vixen, pigeons, rabbits, canaries and foreign birds.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Sunspots and Birds

A record kept at Montdidier, France, 1784-1869, of dates of arrival of birds and rainfall reveals a marked relationship to sunspot variation, according to investigations made at the Dominion Observatory, Ottawa. For instance, the cuckoo on the average arrived two weeks later at sunspot maximum than at minimum.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Very Considerate

"I just had a phone call from Skippy. He's the most considerate boy I ever knew." "What did he have to say?" "He wanted to know if I got home all right from the dance he took me to last night."

Keep Minard's Liniment in the Medicine Chest.

No Unemployment

Problem In Iceland

Country Offers Great Opportunities Through Undeveloped Land

Iceland has no unemployment problem, not because folks have to work to keep warm up there, but because Iceland is an undeveloped land of great opportunities.

The unemployed of Reykjavik totalled eight men on May 1. Six of them were more than 40 years old and in ill health. The other two said they had just left their jobs, and could get better ones.

Iceland, peopled with only 100,000 inhabitants, could comfortably find accommodation and employment for 500,000.

Iceland wants dirt farmers, not men to keep the bright lights of Reykjavik burning. The native Icelanders are good farmers, but not scientific agriculturists.

Government authorities maintain that Iceland could produce far greater quantities of agricultural products than at present, as the soil and climate are excellent for many crops.

An Important Industry

General Public Does Not Realize Value Of Canadian Fish

The fishing industry is one that rarely receives much attention from the general public, but it is an important and growing industry in this country, as one realizes in scanning the concise items sent out from time to time by the fisheries branch at Ottawa. We catch them all the way from sardines to whales. For example, we sold \$2,071,000 worth of fish, nearly all tinned, to Australia in that country's fiscal year, 1927-28. In the first two weeks of May, this year, 20 whales were taken by a company operating from Rose Harbor, B.C. The whales taken off British Columbia are used in production of oil, meal, fertilizer, and are valuable too, for their whalebone.

Maintains Its Popularity

Canadian Salmon Still Holds First Place As To Money Value

Canadian fish have won a great reputation abroad, a reputation that shows in accumulating orders on an expanding scale. This country's salmon—for years the most valuable monetary item in the catch—still maintains its popularity.

Cod, which appears to have been the first lure for the hardy European fishermen of the long ago, comes next and the succulent lobster has third place. Sardines are in the swim too; there have been fine orders from New Zealand and Australia of late years for these tasty fish, and the trade in them grows.

The Friend Of All Sufferers. Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of itself a content. It is on sale everywhere and can be found wherever required for.

Valley Of A Thousand Falls

The same Valley of a Thousand Falls in the Mount Robson District, British Columbia, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman, and participated in his attempt to climb Mount Robson.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable power of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Only hope or experience with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Moose Jaw Tourist Camp

Additional facilities are being provided at Moose Jaw Auto Tourist Camp. Last year about 7,000 people used the camp and the present season is expected to witness a considerably increased attendance.

Minard's Liniment For Rheumatism.

Farm Planning

Town planning in Alberta is now being extended to include farm planning. The farmer may secure expert advice concerning the plans for his house and barns, and the lay-out of his farm.

Firestone TIRES

Eliminating Level Crossings

Will Take Time But End For This Purpose Is Available

It is to be recognized that \$200,000 a year will not make for very rapid progress in eliminating the many hundreds of level crossings in Canada, but this fund, known as the railway crossing fund, at least offers opportunity for gradually getting rid of some of the worst of these crossings. Dr. S. J. MacLean, assistant chief commissioner of the Dominion Board of Railway Commissioners, has drawn attention to the existence of this fund and suggests that it be available in Saskatchewan.

Dr. MacLean has pointed out that the sum of \$200,000 is voted annually by Parliament for the elimination or improvement of railway crossings, and this sum is at the disposal of the Railway Board to distribute as it sees fit. Alberta has recently been granted a considerable amount, and Manitoba has also taken advantage of the fund. Manitoba, in fact, in co-operation with the Railway Board, has done good work in getting rid of some dangerous railway crossings. This has been done by some minor changes in roads and highways, making it unnecessary to cross railway tracks.

Some day the authorities may undertake to eliminate every level crossing in Canada, but on account of the huge expense that would involve, the time appears a long way off. Meanwhile a good deal can be accomplished by the means outlined, and Dr. MacLean's suggestion ought to be widely considered.—Regina Daily Post.

Canadian Teachers' Federation

1930 Convention Will Be Held At Edmonton

The selection of the venue for the 1930 convention of the organization, the election of the executive committee, and the adoption of a number of resolutions comprised the final business transacted at the closing session of the tenth annual conference of the Canadian Teachers' Federation at Quebec.

Edmonton, Alberta, was chosen for next year's conference at a date to be decided later by the executive committee.

The following members were elected to the executive committee of the federation: G. H. Ford, New Westminster, B.C.; A. J. Powell, Fort Sask.; J. R. Mackay, Saskatoon, Sask.; A. E. Heard, Winnipeg, Man.; J. E. Robertson, Toronto, Ont.; Miss L. E. Brittain, Montreal, Que.; H. A. Ricker, West St. John, N.B.; J. A. D. Good, Truro, N.S.; and C. B. Jelly, Summerside, P.E.I.

Caution Is Necessary

Motor Drivers Should Use Heads As Well As Horns

"Use your horn!" that's what it's there for. It is the sound advice of a traffic authority to motorists. He urges them not to steal up behind the unsuspecting pedestrian or pass another vehicle from the rear without giving some signal. "Get the horn-blowing habit," is his injunction. But drivers should also be urged to use their heads, or what are supposed to be heads. Horn-blowing should not take the place of caution. A blast of the horn neither entitles the blower to the right-of-way nor guarantees him a clear path.

Waiter: What's de matter with dat egg, boss?

Dinner: It was served too late to be good egg and 'too soon to be good chicken.

Denied Entrance To States

Young Toronto Inventor Claims He Has More Powerful Substitute For Gasoline

Denied entrance into the United States even for an hour, during which time he had expected to lay his invention before officials of the General Motors Corp., Jack Star, 197 Grace Street, Toronto, claims that he has a lighter and more powerful substitute for gasoline.

Mr. Star is a comparatively recent arrival in Canada, his name in Europe being Jacob Starselski. He is a former racing motorcyclist, and said he had been working on his formula for nine years and had visited Europe, Asia and the continent in search of sources of supply. He carries credentials from Sir Herbert Samuel, British commissioner for Palestine, Mustafa Kemal Pasha and other notables. His researches have involved great expense and long study, he says, and he is working now to obtain world patents on his discovery. He declares he had made arrangements with Frank J. Kinninrath, attorney of Detroit, to assist him. He was denied entry to Detroit, however, for an hour, although he had offered to leave his car with the authorities at the ferry dock.

New Kind Of Festival

Distribution of 100,000 toothbrushes to children in the primary public schools of Chile will be a feature of the "toothbrush festival" to be held throughout the Republic next fall under the auspices of the Chilean Ministry of Education.

The blood absorbs about two pounds of oxygen daily.

It isn't the girl who fires up quickly that makes the best match.

Are You Ready?

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castor. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your little child without use of a single doubtful drug. Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler pains of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

Building of Bay Line May Be But Start of Railway Development in Rich Mineral Districts of North

The golden spike that will be driven next month in commemoration of the completion of the Hudson Bay Railway inspires a vision of future practicalities in Sir Henry Thornton of the Canadian National Railways, in an article in the Saturday Evening Post. He paints a picture of contrasts. He looks back upon the setbacks:

"For years the line lay, uncompleted, crouching, its roadbed sunk so deep in places that the rails rattled forth like steel tentacles. Men have fought blizzards, loneliness, the rigors of sub-Arctic winter to complete it, that there may be a new outlet to Europe, entailing a shorter rail haul, and, strangely enough, a shorter ocean voyage than from any other port on the continent. It is a land of Eskimos and pioneers now."

But what does Sir Henry see pointed to the northward when that golden spike is driven?

"I believe there may be a time when great hotels will rear their selves at Port Churchill, the terminus, to accommodate the tourists who have sailed up the eastern coast, along the fringe of Labrador and through Hudson Strait; then on down through a bay that was once the roving ground of that romantic aggregation known as the Gentlemen of Adventure; at last to disembark and proceed home with the recovery comfort of most civilized travel."

The Hudson Bay line will be given a terminus at Churchill, but that will not be the end of the railway. "A railroad," says Sir Henry, "is never finished." It has to grow with the development it starts. Who dare predict the scope of the development that will gather wings to put to flight the little sweep that already has proved the northward to be a region of riches? What has been revealed before the golden spike has been driven is barely a lifting of the curtain upon the great drama that will be played in the vast hinterland of Manitoba. Other prospects will not be denied their railroad accommodation. The terminus of next month will become the junction of many lines. "A railroad is never finished."

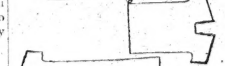

"The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. One of the great mineral fields of the world is up there; smelters are rising, water-power is being harnessed, millions are pouring into the country."

Driving the golden spike will not finish the Hudson Bay line. It will be the birth of the railroad that so practical a railroader as Sir Henry Thornton says is never finished. Manitoba Free Press.

Farmers Help Themselves

Establishing Grain Industry On a Sound Economic Basis

While much is said in regard to the rapid development of Canadian industries, very few people at the present time realize the tremendous efforts the farmers of Western Canada are making to establish the industry of grain growing on a sound economic basis and under full control of the growers themselves, says an article in the "Vancouver Sun" of June 18, 1929. "Every move made by the Pool is based on sound business principles, the object being to secure for the grain grower the last possible cent for his grain. The idea behind the Pool is centralized and continuous control of the grain delivered to the organization, which amounts to over half the total delivered to country elevators, and the members are devoted to the Pool, as they look upon it as being their sole hope of achieving a place in the scheme of things to which their toil entitles them."

TRIM WASH CROCK

You'll find Design No. 166 a most attractive, comfortable dress for mornings or home wear. It follows simple straight lines with front of skirt plaited to form a panel to lengthen the silhouette. The short kimono sleeves have turn-back cuffs; square neckline is finished with shawl collar that affects a deep V at throat. Plaid pique in yellow and white. Nile green linen, cotton, foulard in white with blue polka dots, gingham check in brown and white. Solid white cotton basket weave in orchid prints are becoming fabrics to select. Pattern in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. For the 36-inch size 2 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting is sufficient. Price 25 cents in stamps or coin (coin preferred.)

British Columbia Tobacco

The B.C. Provincial Government has secured fifty pounds of white burley tobacco grown in the Vernon district and will blend it with the Sumas product. The mixture is to be placed on the market to test the commercial suitability of British Columbia tobacco.

The upas tree has a poisonous juice.

Cost Of Rearing Draft Horses

Record Kept Of Cost Of Raising Thirteen Percheron Colts

One of the big problems that the farmers of many provinces will have to face for at least some years to come, is where the necessary draft horses may be purchased. Will they be good horses and the kind desired? How much will they cost?

With the object of throwing light on this question, cost studies have been made at the Ste. Anne de la Pocatiere Experimental Station since 1925. From that year to 1926, thirteen Percheron colts were raised to the age of two and one-half years. The weights of the colts, food consumed, and cost for each colt, was tabulated.

To grow these colts to working age, an average of 4,921 pounds of hay, 3,664 pounds of oats, 990 pounds of bran, and 7.7 months of pasture was required, at an average cost of \$116.37 per colt, weighing 1,517 pounds.

No mention is made of the service fee as this varies with the station used and district, nor has any charge been made of the mares having nursed these colts. At this station, as at many farms where colts are raised, the mares, as a rule, are before giving birth to the colts, and after weaning, worked more than necessary to pay for their upkeep during the year. From the figures given above on the feed consumed by the thirteen colts reared in this five-year period, it will be seen that the average cost is 49 per cent below the cost of draft horses of similar qualifications and weight in the open market. These experiments and many others appear in the annual reports of the experimental farms and stations, which may be had on application to the Publications Branch of the Department of Agriculture, at Ottawa.

Seven Cents For Cheese

Was Considered Good Price Half a Century Ago

A cheese factory account book of 1879, just half a century ago, is in the possession of Walter Strike, of Cherry Valley, Ont. It shows that the highest price received for cheese that year was seven cents. For the month of July, patrons received 33 cents per one hundred pounds of milk, just enough to buy the present-day farmer a gallon of gas to run his car.

To Discuss Young Plan

The conference to discuss the Young plan for settlement of the reparations problem, it is understood, will open August 6. No decision has yet been made as to the place of meeting.

Criticizes History Books

Says Canada's Part In the Great War Passed Over Lightly In Text Books

Public school history text books which have been adopted in several provinces of Canada, contain "19 volumes devoted to the part Canada played in the Great War," stated Dr. J. L. McDougall, formerly of Regina, Sask., now of Vancouver, B.C., national vice-president of the Native Sons of Canada, on the course of an address before the eighth annual convention of that organization at Winnipeg.

"Such a condition of affairs in the education of our children is a national shame and national disgrace," he declared. The text books were published in the United States and edited in the United States by Americans, said Dr. McDougall, Education authorities, when asked for an explanation, had replied "that at the present time there is no one adequately equipped and willing to take the time to edit such a history," the speaker said.

Saskatoon Cattle Show

Breeders Well Satisfied With Prices That Prevailed

At the recent Saskatoon Cattle show and sale, "good average prices were paid for bulls, thirty-eight head or Shorthorn bulls averaging \$170. Fifteen head of Shorthorn females averaged \$114, four Aberdeen Angus bulls averaged \$175, three Hereford bulls averaged \$188, and an aged Holstein bull sold for \$119. Quite a number of bulls, including both the champion Aberdeen Angus and the champion Hereford were bought by Saskatchewan Live Stock, Branch, the buying being attended to by the Live Stock Commissioner. Many of the bulls were quite young but the breeders were well satisfied with the prices that prevailed."

Medicine Hat Air Port

Arrangements are under way to have an air port in Medicine Hat, said Dr. Gershwin, M.P., who recently returned from Ottawa where he has taken an active interest in the project. He understood that the line would link up Calgary and Canmore, Regina and Moose Jaw with Medicine Hat.

Canada's Mica Output

Practically all of the mica produced in Canada is of the amber variety (phlogopite). Mines in the Ottawa region, both in Ontario and Quebec, are the principal producers.

Cuba's most ancient city, Baracoa, is to be improved and embellished after hundreds of years of neglect.

National Research Council Will Endeavor To Solve Many Economic Problems

Rust Resisting Wheat

Three Varieties Of Wheat Which Will Withstand All Known Kinds of Rust

Two or three varieties of wheat which will resist rust have been developed by the department of agriculture. It was stated by Dr. J. H. Grisdale, deputy minister of the department. The experiments have been conducted for some years, but the stage has now been reached when it can be stated with considerable assurance that success is near at hand.

"Our experiments this year confirm the earlier prospects," said Dr. Grisdale. "No names have yet been given the new varieties and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we have the kind now that will resist the known varieties of rust. It is to be remembered, however, that one rust will cross another and evolve a new kind, but the wheat grades discovered by careful research withstand them all. The annual damage done by rust is enormous, so the evolution of a wheat which will be unaffected by it is of incalculable advantage. In rust research we claim to lead the world."

Has Faith In Alberta's Gas Fields

Engineer From Buffalo Predicts Province On Eve Of Great Development

H. R. Davis, an engineer of Buffalo, N.Y., who has recently been making an inspection of the oil and gas fields in Alberta and Saskatchewan, predicts that the former is on the eve of a great development in natural gas production. He states that he is convinced that the surface has only been scratched, and that in the near future there will be an enormous development in the production of gas.

Origin Of The Word "Humbung"

Few people who use the word "humbung" so glibly, realize that it is a corruption of the name of a well-known German port. But years ago, when wars were common on the continent, so many false reports came from Hamburg that people used to say sceptically, "That is Hamburg!" So "Hamburg" became corrupted into "humbung."

Lavas rarely flow as much as a mile an hour.

Waste gas from Alberta's oil fields, loss from fermentation and other problems of the Canadian honey industry and "the iodine content, and control of iodized salts in Canada," will be investigated by the National Research Council. Deputations to undertake this new work in addition to the 100 or more other problems now under investigation, were made at a council meeting here.

All parties actively engaged in seeking a solution of the Alberta gas problem, which includes a wastage of 100,000,000 cubic feet per day, will be represented on the associate committee of the council that will probably hold its first meeting in Edmonton early in October. Dr. Chas. Cammell, deputy minister and other representatives from the Dominion Department of Mines; Dr. G. S. Whitby, professor of chemistry at McGill University; representatives of the University of Alberta, who have given considerable study to the situation and Dr. H. M. Torg, chairman of the National Council, will be included in the personnel.

Work on honey has already been started in co-operation with the Dominion Department of Agriculture at the request of the industry and will be further advanced by an associate committee appointed at the meeting.

Iodine in salt was brought to the attention of the council by the Canadian Chemical Association, and the Canadian Medical Association, the declaration of the former being that "it is not yet certain that the indiscriminate use of iodized salt is entirely beneficial to public health. Sums aggregating \$25,000 were granted at the meeting to aid research projects in Canadian universities."

The largest sum went to Professor T. Thevadson, of the University of Saskatchewan, who for six years, has conducted an exhaustive study of the effects of alkali water on cement and concrete. A grant was made to Professor E. F. Burton, of the University of Toronto, for the purpose of developing his new method of determining moisture content of wheat, wood and other products. A grant of \$2,500 was made to Professor E. H. Boomer, of the University of Alberta, that he might continue his work on the economical utilization of natural gas. Color vision, generation of electricity using the windmill as prime mover, internal parasites of sheep, swine and poultry, design of steel columns and struts for buildings and bridges, blood pressure reactions and the spectra of helium were included in the researches aided.

British Columbia Bulbs

Sent To England To Be Planted In Old Country Parks

British Columbia bulbs, believed to be the equal to the best grown in Europe, will be planted in the public parks of England to encourage their importation into the Old Country, said Premier Tomin, the other day. He added that Sir William Clark, British High Commissioner in Canada, was much impressed with British Columbia flowers when on his recent visit and had suggested to the Lieutenant-Governor, that British Columbia bulbs might be exported to Britain to be planted, and labelled, in the public parks.

Growing Use Of Water Power

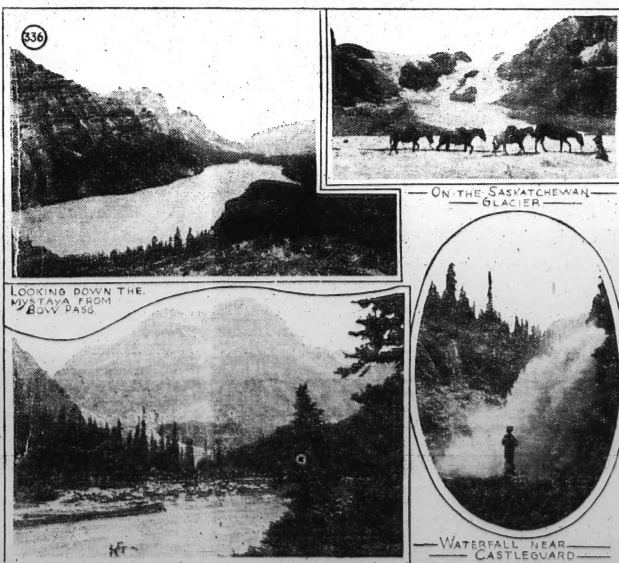

The steady growth in the use of water power in Canada is shown by the facts that the average annual rate of increase in development since 1925 has been 10.7 per cent, and that the total development now amounts to 5554 installed turbine horsepower per 1,000 of population.

Close to 35,000 persons are employed in road construction in Canada each year.

"What has happened?"
"The cat scratched me."
"But what about all those wounds on your head or all she threw the soup tureen at me?"—Esquella, Barcelona.

Riding on the Roof of the Rockies

SHADOW LAKE UNDER THE SHADOW OF MT. BALL

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8, and last 18 days, to take in a long distance ride to the Columbia Icefield, from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent, covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise up the Bow Valley to Bow Lake, over Bow Pass

and by the Mistaya Valley past Waterville Lakes to the North Saskatchewan River, then up the Alexandra River Valley to Castleguard and the Columbia Icefields. Only Trail Riders holding at least the silver button, emblematic of completion of 100 miles of trail riding, will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party.

For less experienced Trail Riders, there will be a four-day ride starting from Banff August 1, and ending at Castle Mountain, Banffshire Camp. It will take in the Eggar Lake district, which will be accessible for the first time this summer, so that those participating in this ride may regard themselves as pioneers. Beautiful Shadow Lake under Mount Ball will be the camp site of the riders on the second day out and, in all, seven glacier-fed lakes will be on the route of the trail.

"I suppose you will soon be married, Giles?"
"Not just yet. Marie's pig is not fat enough yet."—Lustige Sachse, Leipzig.

W. N. U. 1795

"SMILIN' THRU"
On the Fourth Night of Chautauqua, the Charming English Comedy, "Smilin' Thru" will be staged.

First Evening of Chautauqua "THE PATSY"

The opening night of Chautauqua at Irma on August 6th will be the presentation of "The Patsy"—a real comedy drama, which has been called the "perfect Chautauqua play".

The story of "The Patsy" has to do with the younger daughter of a household, who is a combination of flapper and Cinderella. She is slighted by her mother, demeaned and bullied by her unprincipled, shrewish sister. Only her father truly loves and can understand her; and since he was away most of the time as a travelling salesman, this wasn't a very extravagant comfort—hence the title of "Patsy".

"The Patsy" is three acts of comedy, romance, laughter and pathos, telling a most appealing love story, giving the Martin Erwin Players one of the finest acting opportunities ever enjoyed in Chautauqua plays.

Second Afternoon of Chautauqua DR. HOWARD S. ROSS

Howard S. Ross, K.C., D.C.L., is a native of Nova Scotia, and practised law at Sydney, Nova Scotia, for ten years before moving to Montreal eighteen years ago, where he has since achieved distinction.

Dr. Ross has studied at Acadia, Dalhousie and Cornell Universities. He has been a student of economics for the past twenty years and has made a special study of the land and money question, government, industrial relations and method of voting, and assisting in founding the Proportional Representative Society of Canada. He was one of the founders of the Montreal Peoples Forum, and for some years acted as president and chairman of the Educational Committee of Montreal of the Brotherhood Federation made up of men's clubs in a number of churches and is a frequent speaker at such clubs.

"World Unrest—A Suggested Cure" is the subject of the lecture Dr. Ross has prepared. It will be helpful, inspiring and also most informing to farmers, when he, with the authority of an economist, explains co-operative marketing and its benefits.

He will also be delighted to answer any questions at the close of his lecture, and will count it a privilege to come into close personal contact with men and women of the Four-day Chautauqua towns. Audiences will find Dr. Ross witty, brilliant and fluent. There will not be a dull moment throughout the whole of his lecture.

Second Evening of Chautauqua

BIG FEATURE ON MUSIC DAY Marguerite Austin and Her Dixie Broadcasters

This exceedingly popular Ladies' Orchestra, under the direction of Marguerite Austin who will act as Mistress of Ceremonies, will present on August 7th at Irma an ideal musical festival, featuring the finest numbers in orchestral music, interspersed with instrumental solos, duets and quartettes.

From the first item on their exceptional programme these talented young ladies will be at ease with the audience, and extremely popular. They will reflect the joy of accomplishment and the enthusiasm of creative musicianship. Every number will delight all, and the whole programme is so well balanced that not a dull moment will be experienced by the audience.

Marguerite Austin, the gifted young English violinist and director will appeal greatly to Western audiences. She will not be found lacking in anything that pertains to musical leadership, and will be generous in regard to the wishes of the audience in regard to encores.

Third Afternoon of Chautauqua

NEIL PATERSON AND HIS SCOTCH LASSIES

Neil Paterson and his Scotch Lassies appearing at Irma on August 8th give an entirely Scotch programme so entertaining and original that audiences will forget the tedious in-
termissions which have frequently been presented throughout Western Canada.

Like Harry Lauder, Mr. Paterson writes songs and sings them in such a manner as to leave no doubt of his genius as a Scotch medium. He plays well-known Scotch tunes with bagpipes, and plays, by way of contrast, the softest music on the latest instrument, a common saw, and in addition dances the Highland Fling.

Miss Gladys Graham, a member of this company, has won over two hundred prizes for dancing, also for the best dressed lady Highlander. She was the solo dancer with the Princess Pats Band.

Helen Cuthbert Place has the voice, culture, appearance and personality for the rendering of Scotch songs.

There will be real variety, plenty of new songs to mix with the old Scotch songs, and audiences can be assured of a programme of Scotch entertainment, the like of which has not been presented on this Chautauqua circuit.

Third Evening of Chautauqua

GRANVILLE JONES

Granville Jones, styled "The Spokesman of the Common People" will lecture on "The Philosophy of a Hill-Billy" at Irma on August 8th.

The man, his message, and his method are all out of the ordinary and wholly different from the usual lecture attraction. Granville Jones is one of the rare types of men of the indelible sort—a human rail split out of some genealogical tree that is as yet uncut, with the bark and sinews still clinging to him, but sound to the centre. He is a strange mixture of the conservative and liberal, a co-mingling of the blood of the dashing Cavalier and the stern Puritan.

"The Philosophy of a Hill-Billy" is wrought out of a life full of rich experiences. The richest wit and humor abound in his lecture; absolutely fresh and unstudied, Granville Jones' whole discourse is ennobled by flights of fine eloquence and enriched by the tenderest fancy and sentiment.

Fourth Afternoon of Chautauqua Presenting a Programme of Mystery and Magic

A unique Kiddies' programme has been arranged for Chautauqua and will be presented on August 9th at Irma.

John Frye ranks among the foremost magicians of the continent. His programme has great variety. All his attractions are new, unique and novel. They will be found to be the last word in mystery and magic.

Throughout the programme John Frye will keep his audience in fits of laughter through the medium of his subtle humor.

One of his finest attractions is the piecing together of old patches of cloth and making beautiful pictures therefrom.

Mr. Frye has a talented young lady assistant who is an accomplished pianist. She will lend charm and variety to this attractive programme.

Fourth Evening of Chautauqua

"SMILIN' THRU"

"Smilin' Thru," an emotional classic of the modern stage and surpassingly rich in heart interest, will be staged at Irma on August 9th by The Canadian Players under the direction of Ralph Martin Erwin.

This three act play by Allan Langdon Martin, is a fantastic comedy with a wealth of human appeal. Even Norma Talmadge is credited with her finest emotional artistry in the play which was released by the First National.

There is an abundance of humor in the play, but it is one of the truest-to-life comedies ever written. The prologue explains the play's name. In two figures—the mother of the boy and the mother of the girl—are shown smiling through and wishing they might have the man to see and understand. They fade out of action and the play begins. Each character in this play stands out as a great hu-

man etching, and the heart interest is grippingly sustained throughout this entire emotional drama. The final scene in "Smilin' Thru" is altogether unique and extraordinary.

RABIES

There are certain diseases which, although they are comparatively rare and are responsible for but few deaths, attract attention because of the sufferings which they cause and our inability to cure them. For example, we think of rabies with horror, not because it is a common disease or because it causes many deaths, but for the reason that when it does occur, we find ourselves helpless.

The reason why we refer to this particular disease is not in order to cause a thrill of horror, but to remind our readers that rabies can be prevented. The time between the occurrence of the bite and the development of symptoms, the incubation period—varies a good deal; the average in man is about forty days. If the disease is to be prevented, it is necessary that the treatment, which the new Semple method takes fourteen days, be completed, and that fifteen days be allowed for the full development of the protection which the treatment gradually produces. In order to secure the necessary twenty-nine days before the symptoms develop, it is essential that treatment be started at the earliest possible moment.

Persons who are bitten by animals should immediately consult their physician in regard to treatment. The doctor will cauterize the wound with fuming nitric acid and will advise as to the Pasteur preventive treatment after considering the circumstances.

The animal responsible should not be killed, but should be captured and kept. If it has rabies, it will die in a few days. If after ten days, the animal shows no symptoms, this is evidence that it is not suffering from rabies. In the meantime, treatment will have been started because, as stated there is no time to be lost, and it is continued until the physician is certain that it is not required, or, if it is required, until treatment has been completed.

The Pasteur preventive treatment, or rabies vaccination, is not a cure. It is of no value once the disease has developed; it does prevent when given promptly. Its value depends then upon the time factor; given early means success; given late means failure.

Questions concerning health, addressed to the Canadian Medical Association, 181 College Street, Toronto, will be answered personally by letter.

"Doctor, my wife has kleptomania," said a Bruce resident. "What should she take for it?" "Tell her she should not take anything," the doctor replied.

When a Tofield man drove home in a bright, shiny car the neighbors supposed he had bought a new car. Come to find out it was a last week's model.

TRUDEAU'S

"TRUDEAU'S" modern plant at Edmonton carry the most complete line of cleaning and dyeing services to be found in Western Canada today. A special department is operated for out-of-town customers. Write us about any clothes or dress-making problems, we are always glad to assist you.

Mail Order Department

Trudeau's Cleaning & Dye Works LIMITED

EDMONTON, ALTA.
It is a pleasure to us to show out-of-town customers through our plant.

VIKING

Citizens were awakened about four o'clock last Saturday morning by the clanging of the town fire bell, and warning from the telephone central that Reed's livery barn was burning. A large crowd quickly gathered and stood around the big barn which burned to the ground in about an hour. Efforts to save the barn were futile, so attention was turned to saving the nearby buildings. A strong wind was blowing at the time and glowing embers fell for hundreds of feet away. A large burning shingle fell on the roof of the creamery which caught fire but was quickly put out.

For a time it looked as if Viking would have a repetition of the Wainwright disaster, but luckily the flames were kept confined to the barn.

The fire was first noticed coming out of the roof by parties returning from the Bruce stampede who gave the alarm.

There were no horses in the barn at the time. Considerable equipment, such as harness, sleighs, oats, and hay went up in smoke.

The barn was partly insured.

The origin of the fire is unknown. Andrew Holmberg has been elected delegate by acclamation to the wheat pool annual meeting. He will represent the local subdistrict at the convention and will be in other ways responsible to the members in the government of the Association during the coming year.

W. Horner, of Vegreville, finished the work of plastering the new Elks Community Hall on Friday last, and the hardwood floor is now being laid. Mr. Horner is an expert workman and is considered one of the best men at his trade in the province. Before doing the work here he finished a plastering job at the residence of J. F. Murray, at Kinsella.

The Bruce stampede was held last Friday and a large crowd turned out to see the events. A dust storm in the afternoon marred the proceedings to some extent, but on the whole the stampede compared quite favorably with former stampedes held at Bruce.

Ole Ohman returned from Alexandria, Minnesota on Sunday where he had been to attend the funeral of a brother. Mr. Ohman reports that the crops in Minnesota are looking quite good and preparations are under way to begin harvesting.

A. C. Wittmann of Wainwright, was a business visitor in town on Monday. We understand that he has sold his building on Main street to the proprietors of the Viking Cafe.

Messrs. H. Sherman and J. McDonald, of the Calgary Power Co., were visitors in town last Thursday while on their way to Wainwright where the company suffered loss in the recent fire.

From opinions expressed by farmers and others, we gather that this district will have a fifty per cent crop. Some parts that have had the old lucky shower will come through with a fairly good crop, other parts will go fifty per cent, and some, we are sorry to say, will be a total loss. From present indications, prices will be very good.

Extraordinary precautions should be taken while burning brush or rubbish at this time of the year, when everything is so dry, so that no disastrous fires will be started.

The prize lists for the Viking Fair were put in the mails on Monday, and any one not receiving a copy should call at the office of the secretary, H. A. Meredith, phone 104, or at the News Office.

This year it is a very pretentious looking prize list containing 44 pages besides the cover pages.

It is liberally patronized by local merchants and business men whose ads appear within its pages, and we recommend that those living within the radius of the fair which is twenty miles, give serious consideration to the contents of the prize lists.

With the fair only two brief weeks away, it is up to each and everyone in the district to assist in every way possible to make it a success. Some districts have called off their fair, for very good reasons perhaps, but the local fair directorate having every confidence in the people of the fair district have decided, in face of adverse conditions, to carry on in the usual manner. This decision alone should stir everyone in the community to join in and make the fair what it should be.

Wainwright with the disastrous fire of only a few days ago, are going to hold their fair. If they, with all the probability, to contend with are going ahead with their fair, Viking district can surely rise to the occasion under conditions very much more favorable.

The sports committees in connection with the fair state that they are leaving nothing undone to make it a real wind up to the fair.

Dorothy Jones received word from the Toronto Conservatory of Music that she was successful in passing her Intermediate Exam.

We Don't Grind Valves!

Continually regrinding the worn, warped valves of a crippled motor is like preferring a crutch to a cure — within a short time your car comes limping back again for another grind—and another. It wouldn't be so wasteful if each regrinding held that original "new-Car" power, but it doesn't.

**WE DON'T REGRIND VALVES —
WE RE-CONDITION BOTH VALVES
AND SEATS BY MACHINERY**

And What a Difference!

Ask any of our customers, or better still, come in yourself and have your valves inspected carefully and properly.

Grant Hall in the West

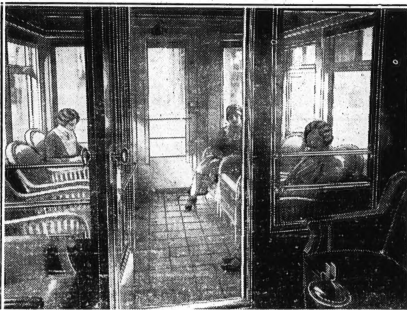

Grant Hall, senior vice-president of the Canadian Pacific Railway, has been taking his annual tour of inspection in Western Canada and is here shown in the grounds of the Empress Hotel, Victoria, with three old friends. They had just returned from a game of golf and the foursome from left to right is: J. E. McMullen, Canadian Pacific solicitor; Mr. Hall; Chief Justice J. A. Macdonald, and E. H. Macklin, president of the Manitoba Free Press, Winnipeg.

Curious Optical Illusion

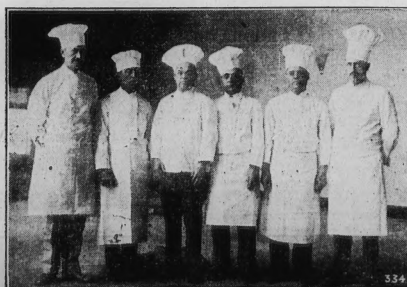

The Duchess of York's 20,000-ton Canadian Pacific trans-Atlantic steamer, is not going to crash the new bridge which, a few days after this picture was taken, was completed across the St. Lawrence in the harbor of Montreal, although the odd result of the photographer's work makes a smash-up seem almost inevitable. As a matter of fact, the bridge is actually 26 feet above the tip of the liner's forecast which itself is 39 feet higher than the funnel. The midjet figures of the steel workers on the bridge give another indication of the great height of the structure.

SUN PARLORS FOR CANADIAN TRAINS

Parlor cars with glassed-in observation platforms are the latest addition to the equipment which the Canadian National Railways are using on their trains between Winnipeg and Duluth and the boat trains between Winnipeg and Port Arthur. Vita glass is used in these sun parlor cars, this type of glass letting in 75% of the violet rays—the health-giving part of sunlight—which are not able to pass through ordinary glass. The size of the windows permits unobstructed vision of the scenery and the cars have been tastefully decorated and furnished. They represent the most up-to-date type of rolling stock in use on the continent.

An Army of Cordon Bleu Chefs

An army, said Napoleon, marches on its stomach, but a hotel prospers as much as anything on its food. These are the men at the Royal York Hotel who are responsible for the good cheer at that famous hostelry which was opened last week by the Governor-General with a distinguished company of prominent Canadians including the president and directors of the Canadian Pacific Railway, the premier of Ontario and many others. These chefs command an army of 175 culinary experts and indirectly another army of 300 waiters. They are from left to right: E. Argange, party chef; E. Albertella, assistant chef; J. Cherrier, head chef; J. Aublard, assistant chef; W. Thonfield, banquet chef; and P. Raaberg, grill chef.

The Wastebasket

Something to worry about—one-third of the population of the earth speaks Chinese.

Heard among the girls at the post office lobby: "I have prizes every morning." "That's nothing, I have dates every night."

"Father, I've a notion to settle down and go in for raising chickens," said a young fellow here. "Better try owls. Their hours would suit you better," the old man replied.

In a western town there is a sign reading as follows:
4076 people died last year of gas.
39 inhaled it;
37 put a lighted match to it;
4,000 stepped on it.

A careful observer reports that a woman is never willing to admit that her shoes are too small or her feet too big.

"How in the world did you happen to become such a wonderful art critic?" asked one of our citizens of a local artist, who displayed a painting. "Well, I've studied the delicate tints of the local girls' complexion at the postoffice lobby every morning while waiting for the mail," he replied.

"Isn't that Viking girl pretty as a picture?" remarked one fellow to another at the Swift's barn dance. "Yes," was the reply, "but I'm afraid it's a talking picture."

Life, says a careful observer, is a matter of grin and bear it. When you're young you grin, and when you're old you bear it.

Heard among the fellows at the dance here: "I think Miss _____ will make an ideal wife. Every time I go to her home I find her darnin' her father's socks." "That caught me, too—until I noticed it was always the same sock."

The Motorists Prayer

Teach us to drive through life without skidding into other people's business. Preserve our brake lining, that we may stop before we go too far. Help us to hear the knocks in our own motors and close our ears to the clashing of other people's gears. Keep alcohol in our radiators and out of our stomachs. Absorb us from the mania of trying to pass the old gas engine on a narrow road. Open our eyes to the traffic signs, and keep our feet on the brakes.

TO A HORSE!

O horse, you are a wonderful thing. No horns to honk, no bells to ring, no license buying every year, with plates to screw on front and rear.
No spark to miss, no gears to strip; you start yourself, no clutch to slip, no gas bills mounting every day to steal the joy of life away. Your inner tubes are all O. K. and, thank the Lord, they stay that way.
Your spark plugs never miss, or fussy, or motor never makes us fuss. Your frame is good for many a mile; your body never changes style; your wants are few and easily met—you've something on the auto yet!

TRY IT

A local student of music has figured out a song for every occasion, as follows:
While walking the floor with the baby—"All Through the Night."
While peeling an onion—"Why Should I Cry Over You."
While sampling your wife's biscuits—"Rock of Ages."
While tuning in on the radio—"Silent Night."
When borrowing from a friend—"Then You'll Remember Me."
While looking into a gas tank with a lighted match—"When I am Gone You Will Soon Forget."
When you can't get central—"Somewhere a Voice is Calling."
When your wife hasn't spoken to you for a week—"Old Pal, Why Don't You Answer Me?"

The local village marshal noticed a sedan parked on a side street here one evening last week, and becoming suspicious that all was not as it should be, he proceeded to investigate. As he drew near the car he could hear noises of a struggle within. He could hear a rustle, probably of silk, and the muffled panting of a man. The body of the car swayed slightly to and fro. He heard a curse and again the muffled panting. He crept softly around to the side and looking in the window he saw—a man trying to re-fold a road map as it had been.

Heard at Sunday School: Teacher "What is the meaning of the word 'Amen?'" Small Boys: (raiding fan) "Signing off."

WORLD HAPPENINGS
BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending marks questions have been concluded and an agreement has been signed.

The first hours issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the provincial loan board.

Peopla's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in leisurely fashion, and inconveniencing patrons.

Two United States fishing vessels seized by the Canadian Government Fisheries Protection steamer "Mala" at Cape Hatteras, 100 miles south of Prince Rupert, recently, were released by Mr. Justice Martin in the Admiralty Division Court.

The much debated revised prayer book of the Church of England will likely be discussed in the British House of Commons again following its endorsement by the bishops assembled in the convocations of Canterbury and York recently.

Dr. Frank L. McKinnon, well known in the medical profession, died at Winnipeg recently after a brief illness. During the war he served for four years in Mesopotamia and was decorated with the Military Cross.

World automobile production increased by more than 1,000,000 vehicles in 1928, as compared with 1927, and set a new record total output for the industry according to a report of the U.S. Department of Commerce. In 1928, Canada produced 242,382 cars, as compared with 179,054 in 1927.

Aaron Sapora, famous co-operative marketing expert from the United States, will again tour Saskatchewan this summer in the interest of a 100 per cent membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic dispatch recently. Mr. Sapora's voice broke down during a recent tour of the West.

Growth Of Co-Operation

Catching The Vision Of Things That Might and Can Be Done

"Co-operation is a growth and a way of living. Each day a larger and larger number of men and women awaken to the full significance of the truth that no man can live unto himself. There are still those, even in this young country, where progress is second nature, who have not been awakened. They have not yet caught the vision of things as they might and can be. They simply do not understand, and we must not become impatient even with these backward members of society."—A. J. McPhail, President of Saskatchewan Wheat Pool.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

A Severe Attack of
Dysentery
Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St., W., Saskatoon, Sask., writes: "My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use On this day his bowels had moved twenty-three times in eleven hours, but four doses checked it."

"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours."

"We both always keep a bottle of Dr. Fowler's handy at all times."

Wheat From Dominion Has Supplanted U.S. Product In Japanese Market

Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tutchiro Shoda, president of the Nisshin Flour Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centers of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver.

Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity of 25,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized ginning.

Helen Wills, who won the women's single championship at Wimbledon, England, defeating Helen Jacobs, her fellow Californian, in straight sets, 6-1, 6-2.

Cross Crossings Cautiously

National System Starts Drive To Combat Level Crossing Accidents

As a further effort in the campaign to reduce crossing accidents, the Canadian National Railways, through the Director of Safety, W. A. Booth, have distributed two thousand copies of a special card of the lithographed face of which, is an appeal to motorists, and others, to "Cross Crossings Cautiously." These posters are being sent out from the headquarters of the three regions in Canada, at Moncton, Toronto, and Winnipeg, Atlantic, Central and Western, respectively, so that every Canadian National grade crossing in the Dominion will be marked. The instructions are to place these posters on poles close to the railway crossings and on the right hand side of approach.

In the letter of instructions it is stated: "The time is now opportune when aggressive methods must be taken to combat the increasing number of highway accidents."

Abolish Corporal Punishment

Juvenile Offenders In Britain May Escape Birch Rod

Youthful law-breakers in England will no longer have to fear the birch rod if a movement to abolish corporal punishment for young offenders is successful.

W. Clarke Hall, London police court judge, explained his opposition to the widespread practice of "birching" at a conference of 70 judges and presented a report showing that 80 per cent. of the boys who had been whipped in a certain court came back again charged with similar offences.

Prosperity Reflected

Marked Growth Is Evidenced On All Sides In City Of Regina

In a booklet issued by the Regina Board of Trade, dealing with statistics of the city as revised on June 1st, marked growth is seen on all sides in the capital of the province. Building permits for the first five months of the year reached a total of \$4,399,772 as compared with \$1,360,855 for the corresponding period of 1928, while bank clearings, postal revenue and other such indices to prosperity all reflect prosperity and expansion.

Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill, Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of \$150,000 for the seed cleaning plant and warehouse at Moose Jaw.

The Columbia Ice Field

The melting waters from the Columbia Ice Field in Jasper National Park, Alberta, feed the sources of three historic rivers in the Canadian west, the Athabasca, the Saskatchewan, and the Columbia, which flow to three separate oceans.

More than half the arable land in Japan is in rice.

Most of the bacon eaten in Britain is imported from Denmark.

Recipes For This Week

(By Betty Barclay)

VEGETABLE SALAD MELANGE

Cook one cup of shredded string beans until tender in boiling, salted water, with one-half teaspoon of sugar. Do the same with one cup of shelled peas. Mix the peas and beans with one cup of shredded cucumber and one-half cup of thinly sliced radishes. Add French dressing and let stand a half hour. Meanwhile, hard-boil six eggs, halve them, and cut off the ends so they will stand upright. Arrange the halves of the eggs on salad plates. Arrange crisp lettuce leaves around each egg half, and place some of the vegetable mixture on the leaves. Serve very cold with mayonnaise.

VANILLA CUSTARD FLUFF

1 junket tablet.
1 tablespoon cold water.
1 pint milk.
1 1/2 tablespoons sugar.
1/2 teaspoon vanilla.
2 eggs.
Crush the junket tablet and dissolve it in the cold water. Add sugar to milk and heat to lukewarm—not hot. Add vanilla and beaten egg yolks. Stir in the stiffly beaten whites of eggs. Then add the dissolved junket tablet; stir a second. Pour into individual dessert glasses; let stand in a warm place until firm; then cool before serving. Some of the egg white will rise, making fluffy topping. Sprinkle with grated nutmeg.

Information On Water Power

Government Has Data Concerning Water Power Throughout the Dominion

The comprehensive system of compiling all available data concerning water power resources and development throughout the Dominion instituted by the Dominion Water Power and Reclamation Service, of the Department of the Interior, many years ago, and maintained with constantly increasing efficiency and thoroughness, places exceptionally complete information on this great natural resource at the disposal of the public. This compilation of one central source, for areas under either Dominion or provincial administration, the latter by collaboration with the provincial governments, enables an exceptionally complete review of the resources of any watershed of other area in the Dominion.

Awarded Scholarship

Chemistry Instructor At Saskatchewan University Receives High Honor

Norman S. Grace, instructor in chemistry at the University of Saskatchewan, has been awarded the Bell scholarship to the University of London, Eng., where he will continue his studies in chemistry. This award is considered a high honor as there are only three of these scholarships for the British Empire, and they have not often been given to Canadian students.

The winner is the son of Mrs. E. R. Grace, 1034 4th Street.

S. A. H. Grace, who recently won first class honors in physiology at Oxford where he holds a Rhodes scholarship, is a brother, as is also Nathaniel H. Grace, who has frequently appeared in University honors lists.

For First Offenders

Attorney-General Of Ontario In Favor Of More Frequently Suspending Sentence

The Attorney-General of Ontario, Hon. W. H. Price, would enlist the sympathy of judges and others in favor of more frequently suspending sentence on first offenders. After a long and varied experience it is his opinion that lives are frequently wrecked by court sentences for offences against the laws that are really not very serious in character. It is undoubtedly true that once a boy or man has the stigma of conviction against him he is badly handicapped in the race of life. Mercy is not being asked for those hardened in crime, but for those who have committed their first fault. One cannot but sympathize with the idea.

A woman first sheds a few tears—and then proceeds to open the telegram.

Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council reserved judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 18 of the Canadian Fisheries Act of 1914, were ultra vires of the Dominion parliament.

The important point at issue is whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament can set up a system of licensing of fish canners as it sought to do under the sections of the Fisheries Act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as British Columbia fishermen of Japanese origin.

Towns Form Boards Of Trade

"There is no better evidence of faith in a district than the example of its business men forming a Board of Trade to advance its welfare," says the Edmonton "Chamber of Commerce News." "During the last month, boards have been organized at the following towns: Thorold, (H. B. Secretary); Kinsau, (C. F. Field, Secretary); and Slave Lake (A. Peart, Secretary)."

Record Of Fire Losses

Fire losses in Canada during the week ended July 10, 1929, are estimated by "The Monetary Times" at \$239,500, as compared with \$139,200 for the previous week, and with \$204,750 for the corresponding week of last year. From January 1, 1928, fire losses totalled \$11,135,950, and from January 1, 1929, to July 10, 1929, they were \$12,976,250.

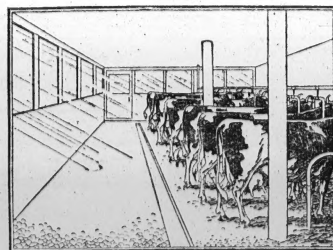

More than 1,350 shocks were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold, will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 150 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, heads a party of four that visits Blackie Joe's night club in downtown New York. Al Stone, Blackie's chief comedian and singing waiter, begs Molly, the ballad singer, to render a love song he has just written for her. Molly is disdainful and refuses even to read the song. Al is in love with her but she tells him harshly that she will never marry a waiter. Then she leaves her dressing room and goes to the Marcus table, trying to ingratiate herself with the famous producer. Al is in despair, Grace, the cigarette girl, who loves Al and wants to see him happy, asks him what to do.

CHAPTER V

"Nothing's the matter, kid," said Al, making a show of throwing off his depression. "But his was smile belied his words."

Grace gazed hopefully up into his face. Her expression said plainly that if he would only confide in her she was sure she could help him.

Slowly he studied her young, sensitive features. She was an awfully sweet kid, undoubtedly, and he liked her, but—

At that moment someone else arrived to interrupt his thoughts. Blackie, all excitement, entered the corridor, calling out:

"Get ready Al—you're on next!"

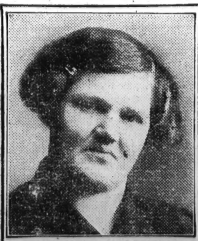

Al turned lack-lustre eyes toward Blackie. "Then, suddenly, a plan that had been forming vaguely in his mind ever since Molly's harsh exit, took definite shape. He drew himself up and said quietly:

"Blackie, I'm quitting tonight."

Blackie retreated a step as if he had been struck, while a little cry of amazement-escaped Grace. Her hand went to her mouth in a quick gesture of apprehension. Blackie was the first to recover himself.

"Don't be a fool, Al," he said earnestly, putting a hand on his singing waiter's shoulder. "You've got a good job here and a following among the customers. You can't quit off-hand like this—why, it wouldn't be fair to me or to yourself."

Al nodded slowly. Yes, he had thought of that. But there were other things to be considered. "You won't miss me," he suggested.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMullen, Vanessa, Ontario.

Lydia E. Pinkham's Vegetable Compound

Small E. Pinkham Med. Co., Lynn, Mass., U. S. A. 100 St. John, Ontario, Canada

W. N. O. 1795

Molly and you feel it. If you go out there and forget yourself, and sing it at her, you can make her feel it. Take a chance they can't kill you. If the song goes over she'll understand for the first time how you really feel about her. Look what you stand to win!"

Al stared into the earnest eyes of Blackie, almost convinced. Could he do it, could he put the same feeling into his singing that had possessed him when he wrote the song. If he could he might be able to touch Molly's heart, as Blackie suggested.

Little Grace watched anxiously the play of expression on Al's face. She saw clearly what Blackie was driving at before Al saw it, and she hoped desperately that he could prevail on Al to try the song. If the words touched Molly's heart at least Al would be happy, which would make Grace happy.

"I'll do it," he said finally, with a gesture of decision. "I'll show her I'm something better than a waiter. I'll put everything I have into that song."

Blackie wrung his hand. "Go to it, boy," he said enthusiastically. "You'd better make your entrance as soon as you can—while you're in the mood. Meanwhile, I'll see how the show's going."

When Blackie disappeared Grace also vanished down the corridor. But as Al came out into the main room a moment later, he heard his name called. Grace slipped over to his side, looked up into his face with a forced, wistful smile and whispered:

"I'll be rooting for you, Al!"

"Will you, kid? Say, I appreciate it."

He raised his hand, putting her lightly on the cheek, as he would have caressed a sister. He noticed that her cheek was too warm, but he thought it was merely from excitement.

As he turned nervously away Grace raised her hand to her face, where his hand had rested for an all too brief moment. The spot was burning. She saw him move lightly across the room and approach the pianist to give him the new music. The pianist's mouth opened in astonishment at the sight of Al Stone, the comic, singing a heart song. Then Grace saw the man she loved heading for another woman. Would he put it over?

The Newest Discovery

American Chemical Society Told Gasoline Can Be Made From Trees

Gasoline made from trees is announced in a report to the American Chemical Society by Dr. Jacques C. Morrill and Dr. Gustav Egloff of Chicago.

They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel now is in the laboratory stage, the report says it can be made in commercial quantities from present wood waste.

"The development of a practical and economic means of converting wood waste into motor fuels," says the report, "has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuels for the future which is under the direct control of man."

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions."

Approximately 24 per cent. of the standing tree is converted into useful products, while 76 per cent. is wasted.

Want World Peace

A petition signed by 17,800 women voters of the district of Bolton, asking the House of Commons to use all possible efforts to secure world peace by the fullest use of the Kellogg pact and the optional clause of the compulsory arbitration agreement, has been presented to the House by Albert Law, Labor leader.

Brick Yard For Prince Albert

It is reported that the International Clay Products Company, of Estevan, have purchased property in Prince Albert with the intention of making bricks there.

New Invention a Success

Pittsburgh Has First Aluminum Street Car In World

Pittsburgh has the first aluminum street car in the world. This car, as either the Pittsburgh Railway Company or the Aluminum Company of America will say, has the formal title of the new lightweight aluminum car No. 6002.

This innovation in car building made its first trip through the Southside and Southlands districts. The car is built for vision—for the passengers. It has windows without the usual paneled obstructions, and those same windows can be raised or lowered at leisure with the same ease and the same sort of gadget as an automobile's.

The vehicle was built with special attention to speed, comfort and safety. The seats are form-fitting and can recline in ease in the floor. The floor is a non-skid composition. The lights are subdued, arranged so as to give their rays almost directly.

New Air Base Established

Mineral Exploration Company Will Make Headquarters At Sioux Lookout

The Northern Aerial Mineral Exploration Company have decided to make Sioux Lookout, situated on the main line of the Canadian National Railways, their headquarters for operations in the Patricia District, and they announced recently that a 200 acre camp site on the lake front has been laid out, which will be the nucleus of a modern village with all conveniences. It will contain shipways, hangars, offices, machine shops, and assay office. Sioux Lookout is the scene of much activity; engineers and scouts for the chief mining concerns are establishing headquarters at this point for the season's activities. They include the Mining Corporation, Atlas Exploration, Nipissing, Huronian Belt, and Lindsey and Connell interests.

Minard's Liniment for Neuralgia.

Reduction In Canada's Debt

Net Debt Of Dominion Decreased By \$92,620,138 Last Year

The net debt of the Dominion of Canada decreased by \$92,620,138 in the twelve months ended June 30 last, according to figures issued through the finance department. At the end of June, 1928, the net debt stood at \$2,244,142,450. On June 30 last, it amounted to \$2,151,522,317. During the first three months of the present fiscal year, which are covered by the statement issued recently, ordinary revenue of the Dominion showed an increase of \$13,529,152 over the corresponding period a year ago. The increase in ordinary expenditure is shown as \$591,266. The statement represents only the receipts and payments which have passed through the books of the finance department up to the last day of June.

Fresh Supplies In Demand. Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape bottles and can be carried without fear of breaking.

Edmonton Soap Factory

It is reported that a soap factory will be opened in Edmonton shortly by United States interests and will engage about seventy-five people. J. C. Moore, Calgary, is the managing director and he is reported as stating that at present negotiations are pending for the purchase of a plant and site, also that machinery and supplies are now in transit.

Government To Aid Berry Growers

The B.C. Government has undertaken to assist berry growers to preserve their surplus crop of the 1929 season and is advancing a loan to a company to be known as Berry Processors Limited, which will have plants at Victoria, New Westminster and Hazelton.

The up-and-coming man is pretty likely to succeed, unless he is up at four and just coming home.

Something In Weather Cycles

Records Show Seasons Have Practically Followed Same Curve

Looking back over weather records makes one believe, says an English writer, that there really may be something in the sun-spot theory of a ten-to-twelve year cycle of weather over Western Europe. There was a spell of hard winter in 1850, another in 1866, a third in 1914, and now here we are having a fourth in 1929. The summers, too, have followed more or less the same curve. But why should sun-spots affect only Western Europe? Must not the influence of the Atlantic Ocean be taken into the account?

Rebukes Cameraman

Colonel Lindbergh Did Not Like His Dishonest Method

Col. Charles A. Lindbergh delivered a lecture at San Francisco on honesty and integrity. The colonel, whose aversion to sound reefs is well known, was approached by a "talkie" cameraman, who had a microphone concealed under his sweater. The flyer detected the ruse and said: "That's not honest; why didn't you approach me with the microphone in plain sight? That would be the honest thing to do." He refused to talk for the "talkie" because you have not been fair in this matter."

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhea, dysentery, colic and stomach troubles in this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if chicks sold each year runs into the millions. The Department now provides a guarantee that a farmer buying chicks from an approved hatchery may rest assured that the stock from which the hatching eggs came conforms to a high standard of excellence, and that the hatchery in which the chicks were incubated was clean, sanitary, and well conducted.

Little Helps For This Week

"The eternal God is 'thy refuge, and underneath are the everlasting arms." Deut. xxxiii. 27.

What though the way be rough and steep? What though we stumble as the blind? There's joy reserved for those who weep.

The everlasting arms are kind. What matters it if sorrows come? What though the night be dark and long? The darkest cloud but hides the sun; The everlasting arms are strong.

One great purpose in all affliction is to bring us down to the "Everlasting Arms." What new strength and peace it gives us to feel them underneath us! We know that, far as we may have sunk, we cannot go farther. Those mighty arms can not only hold us, they can lift us up. They can carry us along. Faith, in its essence, is simply a resting on the everlasting arms. — Theodore L. Cuyler.

Main Street

Word has been received that Charles
Wakefield, died suddenly at the home
of his daughter at Manitou, Manitoba,
on July 28th. The late Mr. Wake-
field was a one time resident of the
Irma district. He leaves to mourn his
loss, a widow and the following
children: James Wakefield of Battle
Heights, Alta., Mrs. Cecil King, of
Regina, Mrs. Maloney of Manitou,
Man., Mrs. Jones, of Blucher, Sask.,
and Edward of Manitoba.

Born to Mr. and Mrs. T. Knowles,
Tuesday, July 23rd, a daughter.

Mr. E. T. McDowell motored to Ed-
monton the first of the week.

Over two hundred attended the An-
glican Picnic held at Steffensen's
hall, Wednesday afternoon.

Mrs. Locke returned Wednesday af-
ter a two month visit at her old home
on Prince Edward Island.

Mr. J. Bishop has been enjoying a
visit from his brother and sister from
Clyde, Alta.

Mrs. Schonert returned Saturday
after spending a couple of weeks in
the city.

Mr. T. Shaw is around again after
being laid up for two weeks with a
painful attack of inflammatory rheu-
matism.

Mr. Wm. Thorp and family intend
leaving Saturday night for Victoria
B. C. where they intend making their
future home.

The hot weather of the past week
has hastened the ripening of the early
wheat and if no rain comes within the
next few days cutting will be on the
first of the week.

Mr. and Mrs. Carl Soniff, returned
Sunday after a trip to Vancouver,
B. C. Mr. Soniff has resumed his
position as foreman of the Irma East
Section.

Mr. J. Jack's father and brother
spent the week end with him at Irma.
Mr. Jack, Sr., has returned to his
home at Clyde but his brother Alfred
is still at Irma.

Mr. D. A. McConnell, publicity com-
missioner for the province of Alberta,
and Mr. A. Bythe, of the A. B. C.
studios, Edmonton stopped over in
Irma Thursday evening on their way
to the Wainwright oilfields where
they will take some views.

Wainwright Fair will be held next
Tuesday and Wednesday. Entries
close at 6 p.m. Monday night, as there
will be no Fair at Irma this year, the
nearest fair to Irma will be at Wain-
wright. If you have any grain, gar-
den crop, poultry or stock take it
along and help the fair.

Mr. Willard Chase and his uncle
Mr. John Patrick, arrived from Michi-
gan Tuesday morning to attend the
funeral of the late O. L. Chase. Will-
ard and his uncle intend returning
about the end of the week.

Among those attending the funeral
of Mr. Chase, Tuesday afternoon,
from outside the Irma district we no-
ticed the following: Mr. and Mrs.
Grant, of Delia, Alta., Willard Chase,
brother and Mr. J. Patrick, uncle,
from Michigan; Mr. and Mrs. Maine
of Millet, Alta., Mrs. E. Allen, of
Forestburg, Alta., Mr. and Mrs. Shed-
don, of Edmonton, Alta., Mr. and Mrs.
Banks, Miss Irene Banks, Mr. and
Mrs. B. Chieson and Mr. Bohnke, of
Strome, Alta.

Mr. G. J. Triphon, of Dixon, Cali-
fornia spent the week end at Irma
the guest of Mr. and Mrs. H. W. Love.
Mr. Triphon, is the largest honey pro-
ducer in California, averaging from
eighty to one hundred and thirty thou-
sand pounds per season. Mr. Triphon
is also a large shipper of package
bees which go to all parts of the U.S.
and Canada. During his stay in the
Irma District he intimated that he
was greatly pleased with conditions
in Alberta and Saskatchewan and
thought that he might locate some
apiaries in the western provinces in
the near future.

TENDERS WANTED

Tenders called for painting inside
walls and ceiling of Silver Lane
school. There are 530 sq. ft. of wains-
cot, dark slate, 830 sq. ft. of upper
wall, light green, and 464 sq. ft. of
ceiling, white. Only best quality
paint to be used. Also 60 sq. ft. of
blackboard to be sand papered and
re-slatted with materials provided. The
lowest or any tender not necessarily
accepted.

T. Paul Richmond, Sec.-Treas. Har-
disty. 31c.

INITIAL PAYMENT OF

\$1.00 BY WHEAT POOL
One dollar a bushel will be the in-
terim payment on wheat for grain de-
livered to the 1929-30 crop, according
to an announcement made Tuesday
morning at the Alberta Wheat Pool
office.

Last fall, when a bad slump in
wheat prices occurred, the initial pay-
ment was lowered from \$1.00 to 85
cents, but the previous interim pay-
ment will be issued this fall.

Rumors of an interim payment to
be issued soon has been circulated
throughout the country, but the Wheat
Pool officials would make no comment
upon this rumor.

NEWS ITEMS FROM JARROW

A well attended meeting of the com-
munity Club was held on Monday
evening in the hall. It was decided to
charge ten dollars or twenty-five per
cent for all outside entertainments
for use of the hall. Meetings, two dol-
lars and all local affairs to use the
hall free of charge. A vote of thanks
was given the women who so gener-
ously cooked and provided meals for
the men while they were working on
the building of the hall. Also a vote
of thanks to the men who worked so
hard and to Mr. R. Whitford for the
capable way he handled the men. Mr.
H. Symonds, was appointed manager
of the hall.

This district was shocked to hear of
the death of Mr. Chase. The Mason's
and quite a number of friends attend-
ed the funeral in Irma on Tuesday.

Mrs. J. McCracken and Mrs. R.
Heron are camping with Mrs. Roy
McCracken at Hardisty lake.

Sunday school will re-open on Sun-
day after a month's rest. We hope
all the boys and girls will come on
Sunday at eleven o'clock.

We understand that McDougall Bros
are going to build another garage in town.
We are very pleased that we are not
losing these citizens of our town.

Richard Morby and John Stratton
left for Melville, Sask., on Monday
where they will work in future.

Quite a large number from town at-
tended the U.F.W.A. picnic held at
Pendleton's lake on Friday afternoon
and in spite of a slight shower report
a good time.

We are sorry to hear of Mrs. C. A.
Jenkins illness in Hardisty hospital
and hope she will soon be well again.
Mrs. Roy Morby and children,
Dorothy Hudson and Raymond who
has been visiting Mrs. O. R. Morby
left for Melville, Sask., on Monday.

NEWS ITEMS FROM KINSELLA

Mr. and Mrs. Smogard and Mr. and
Mrs. Wanzness returned from Banff
Saturday night where they spent the
week.

The Union Sunday School picnic
was held last Thursday at Corbett's
Lake. Everyone present reported a
good time.

Miss Dorothy Williams returned
Saturday after spending two weeks
with her aunt at Ponoka.

Mr. Markell, cattle buyer spent a
couple of days in the district looking
over prospects.

The Ladies Aid will meet at the
home of Mrs. Smogard, Thursday,
August 8th.

Mrs. W. M. Anderson returned from
Wainwright Sunday.

Miss Bishop of Vermilion spent the
week end with her sister, Mrs. Neale.
Mr. J. Neale attended the funeral
of Mrs. Neale's grandfather, at Ver-
milion last Friday.

Making

Low Cost Vacations

Possible for Thousands of
Residents in Western Canada

IN arranging low fares for prairie
residents, we regard this part of our work
as a great and important public service
... always ready with men, equipment plus
the experience which enables us to care for
any movement with smoothness and effi-
ciency.

Suggestions:
Jasper National Park,

Minaki,
Ontario, Quebec,
Maritime Provinces,
Overseas Tour.

THIS summer—escape for a little while
from the dull sameness of succeeding
days. Our low fares from May 15th
to Sept. 30th (with a final return limit Oct.
31st, 1929) make it easy.

OUR trains pass through a territory
replete with scenic grandeur; of his-
torical and educational value to the
traveller. Nothing superior to our sleeping
and dining car service ... Radio, an added
feature on through trains.

THINK IT OVER!

Whatever vacation section you have in mind, our local agent will
be pleased to give every assistance. He will be glad to quote
lowest fares and make all arrangements for you—or write
